PROFESSIONAL OBJECTIVE

I am a student of Information Technology Analysis, with a meticulous and demanding approach to both my studies and my work. I consistently strive to achieve a high level of expertise, developing both technical and soft skills that allow me to stand out in technological, academic, and professional environments.

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Auren - Mar 2025 - Present

Full-stack development (frontend-focused) for internal management applications and client projects.

Relevant technologies: C# (.NET, EF), Next.js, SQL Server, HTML, CSS, JavaScript, Tailwind, Bootstrap, Git, GitHub, among others.

- Actively contributed to the development, integration, testing, and maintenance of an internal production project.
- Led the frontend development of a construction management system, defining the architecture, components, and UI flows.
- Implemented specific backend features and corrected errors to ensure proper frontend-backend integration.
- Refactored legacy frontend code, improving maintainability, user experience, and visual consistency.

Full-Stack Developer

Barbería Simois - Jun 2025 - Mar 2026

Full-stack development for a barbershop and customer management application.

Relevant technologies: Next.js, Node.js (Express.js), SQL Express, Tailwind, Git, GitHub, AWS, TypeScript.

- Complete management of appointments, customers, branches, barbers, stakeholders, products, services, discounts, and schedules.
- Control metrics.
- Client facing app and employee facing app.

Full-Stack Developer

Algo Rico Santa Lucía - Jan 2023 - Mar 2025

Full-stack development for a bakery management application.

Relevant technologies: JavaScript, React, CSS, Bootstrap, MongoDB.

- Email integration for record keeping and information tracking.
- Inventory, pricing, and revenue tracking.
